	Office Action Summary	Examiner		Art Unit				
	The MAILING DATE of this communication annual	The T. Ho		2151				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status								
1)⊠	Responsive to communication(s) filed on <u>14 June 1999</u> .							
2a) <u></u> □	This action is FINAL . 2b)⊠ Thi	is action is	non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

- 1. This action is in response to the application filed 06/14/1999.
- 2. Claims 1-13 have been examined and are pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-4, 6-9 and 12 are rejected under 35 U.S.C. 102(b) as being unpatentable by Leach U.S Patent No. 5,805,885.

As to claim 1, Leach teaches generating at runtime (at runtime, lines 22-23 column 11) a class (objects, lines 15 column 11) that implements an interface (interfaces, line 25 column 11) specified at runtime having a method (202, 205 and 206...Fig. 2); creating an instance (instances are created, lines 21-22 column 11) of the class; receiving by the class instance a request (an external request is made, line 12 column 22) to process the method (lines 12-15 column 22) of the interface (IPrint interfaces, line 20 column 22); and dispatching the request to an object to facilitate processing of the method of the interface (Fig. 7C).

As to claim 2, Leach further teaches generating at runtime (at runtime, lines 22-23 column 11) a class that implements more than one interface (interfaces, line 25

Art Unit: 2151

column 11) specified at runtime, each interface having one or more methods (methods of 202, 205 and 206...Fig. 2).

As to claim 3, Leach further teaches receiving the dispatched request by the object (S1 interface is requested, line 12 column 27); and returning a result by the object (returns a pointer, line 15 column 27).

As to claim 4, Leach further teaches specifying an object to process method (determination which interface to retrieve and how to invoke, lines 9-10 column 23) invocations on the instance.

As to the computer product of claim 6, note the discussion of the method of claim 1 above.

As to claims 7-9, note the discussions claims 2-4 above, respectively.

As to the system of claim 12, note the discussion of the method of claim 1 above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leach in view of Hailpern U.S Patent No. 6,275,937.

Application/Control Number: 09/332,029

Art Unit: 2151

As to claim 5, Leach discloses receiving at runtime an indication (at runtime, lines 22-23 column 11) of at least one interface (interfaces, line 25 column 11) having a plurality of methods (methods of 202, 205 and 206...Fig. 2); and generating at runtime a class (objects, lines 15 column 11) that implements the interface (interfaces, line 25 column 11) by generating code for each of the methods (Code Table 3, column 12, 13 and 14). However, Leach does not teach an invocation handler.

Hailpern teaches an invocation handler (Process Execution Handler 4050, Fig. 7) that executes processes (lines 31-50 column 15). It would have been obvious to apply the teachings of Hailpern to the system of Leach because this allows dynamic aggregating objects at runtime as disclosed by Leach (line 48 column 9 to line 4 column 10).

As to the computer product of claim 10, note the discussion of the method of claim 5 above.

5. Claims 11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leach in view of Hailpern and further in view of Hughes U.S Patent No. 6,345,382.

As to the method of claim 11, note the discussions of claims 1-3 and 5 above. However, Leach as modified does not teach proxy class. Hughes teaches instance of proxy class specified at runtime (dynamically specifies at run time an instance of the Proxy class 107, lines 6-8 column 8). It would have been obvious to apply the teachings of Hughes to the system of Leach because this allows dynamic loading of customized behavior for a derived class when source code for its base class is unavailable as disclosed by Hughes (lines 50-53 column 1).

Application/Control Number: 09/332,029 Page 5

Art Unit: 2151

As to the system of claim 13, note the discussions of claims 1, 5 and 11 above. Leach as modified further teaches the use of a memory (memory, line 39 column 11) and a processor (central processing unit, lines 38-39 column 11).

Conclusion

Please refer to the references listed on the attached PTO-892, which are not relied upon in the claim rejections detailed above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to The T. Ho whose telephone number is 703-306-5540. A voice mail service is also available for this number. The examiner can normally be reached on Monday – Thursday, 8:30 am – 6:00 pm, and every other Friday from 8:30 am – 5:00 pm.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C 20231

Or fax to:

- AFTER-FINAL faxes must be signed and sent to (703) 746 7238
- OFFICAL faxes must be signed and sent to (703) 746 7239
- NON OFFICAL faxes should not be signed, please send to (703) 746 7240
